❖ GraphEdit

1) Download GraphEdit from link below.

http://www.videohelp.com/tools/GraphEdit

2) Uncompress the package.
3) Open GraphEdit after connecting the camera to PC. And click"Insert a filter".

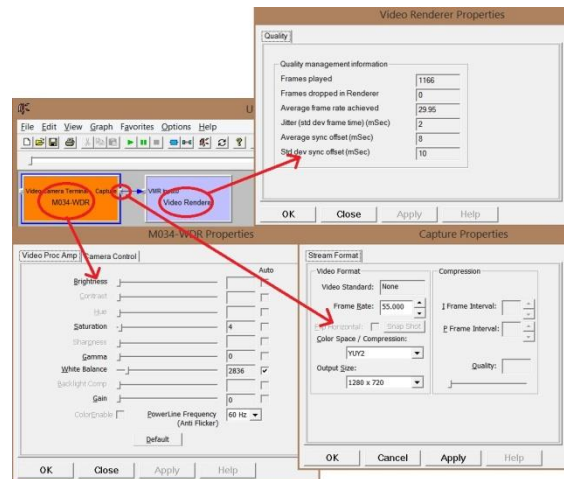

4) Select the camera device and click "inset filter".

5) Right click "Capture", then click "Pin Properties" to choose a resolution.

6) Right click "Capture", then click "Render Pin".

7) Click "Play the graph". Video window will pop up.

Firmware Update

1) Re-connect the USB camera.
2) Open "LP_USB3_FirmwareUpdateTool.exe" which is in the "CameraUSB30_x_x.zip" package.

3) Click "FW Update" and select the .lif file.
4) Once the Firmware update is completed, the status will be updated as "Program Succeeded". Please re-plug the camera before viewing the streaming.

Note: If the driver installation is not successful, and the "FW Update" button is not available any more, please check whether there's a "WestBridge" under device manager. The driver of "WestBridge" can be downloaded from the link below and updated manually. After the driver is installed correctly, please repeat the firmware update procedure.

https://www.dropbox.com/s/2tq036z766ct60f/WestBridge_driver.zip

To update the driver manually:
a. Right click on "WestBridge" and select Update Driver Software.
b. Choose browse my computer for driver software.
c. Click Browse, locate the driver at the downloaded and unzipped folder.
(C:\temp\driver\bin\ for example)
d. Click next and complete the installation process.
